

Vaporless Manufacturing Inc.
Leak Detection Equipment
For The Petroleum Industry
(Revised 08-13-2002)

All Vaporless Manufacturing, Inc. leak detectors are third party approved and those approvals have been submitted to all fifty states. Our products are used in every state. We have letters on file from state environmental regulatory agencies approving our products. Some states maintain a listing of all approved products and some refer to the National Work Group as their source of product approval. Below are some of the states that maintain their own approved equipment list and also the link for the National Work Group. Additionally listed below is the New York City Approval number.
